Student Engagement

Student Engagement & WEXP Report

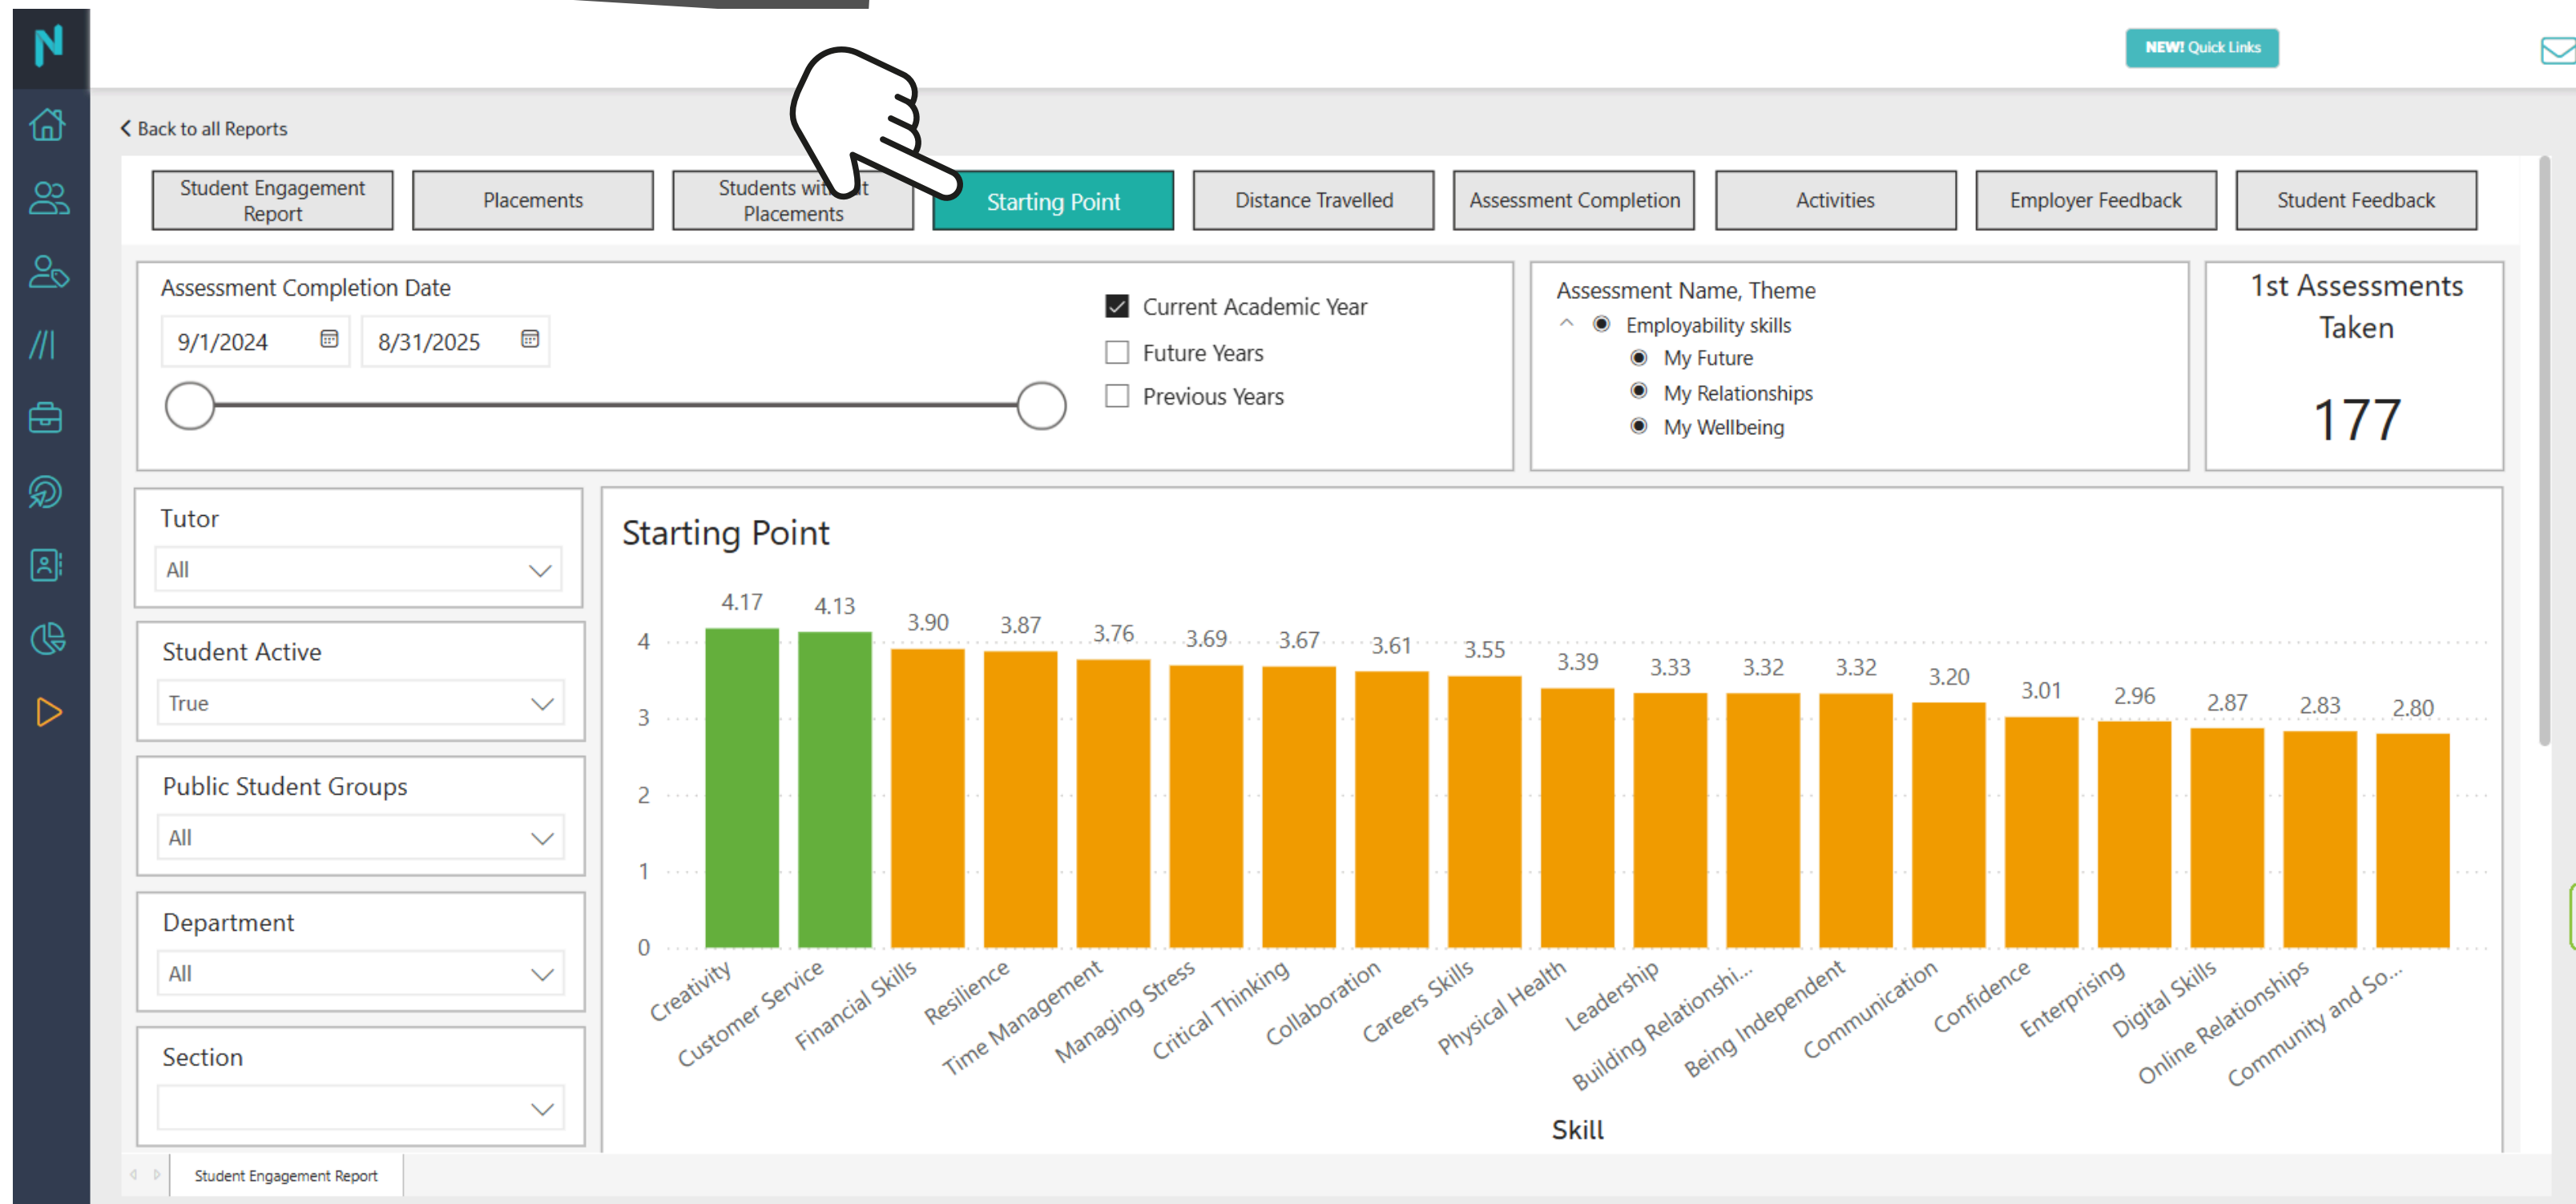

The Student Engagement and Work Experience (WEXP) report delivers comprehensive data on the progress of students, both at the departmental and individual levels. It illustrates the extent of student interaction with the Navigate platform, detailing their current status and progress within their placements, enrichment programmes and employer engagements.

Starting Point

This will show you the scores for a students first Skills assessment (defaults to current academic year)

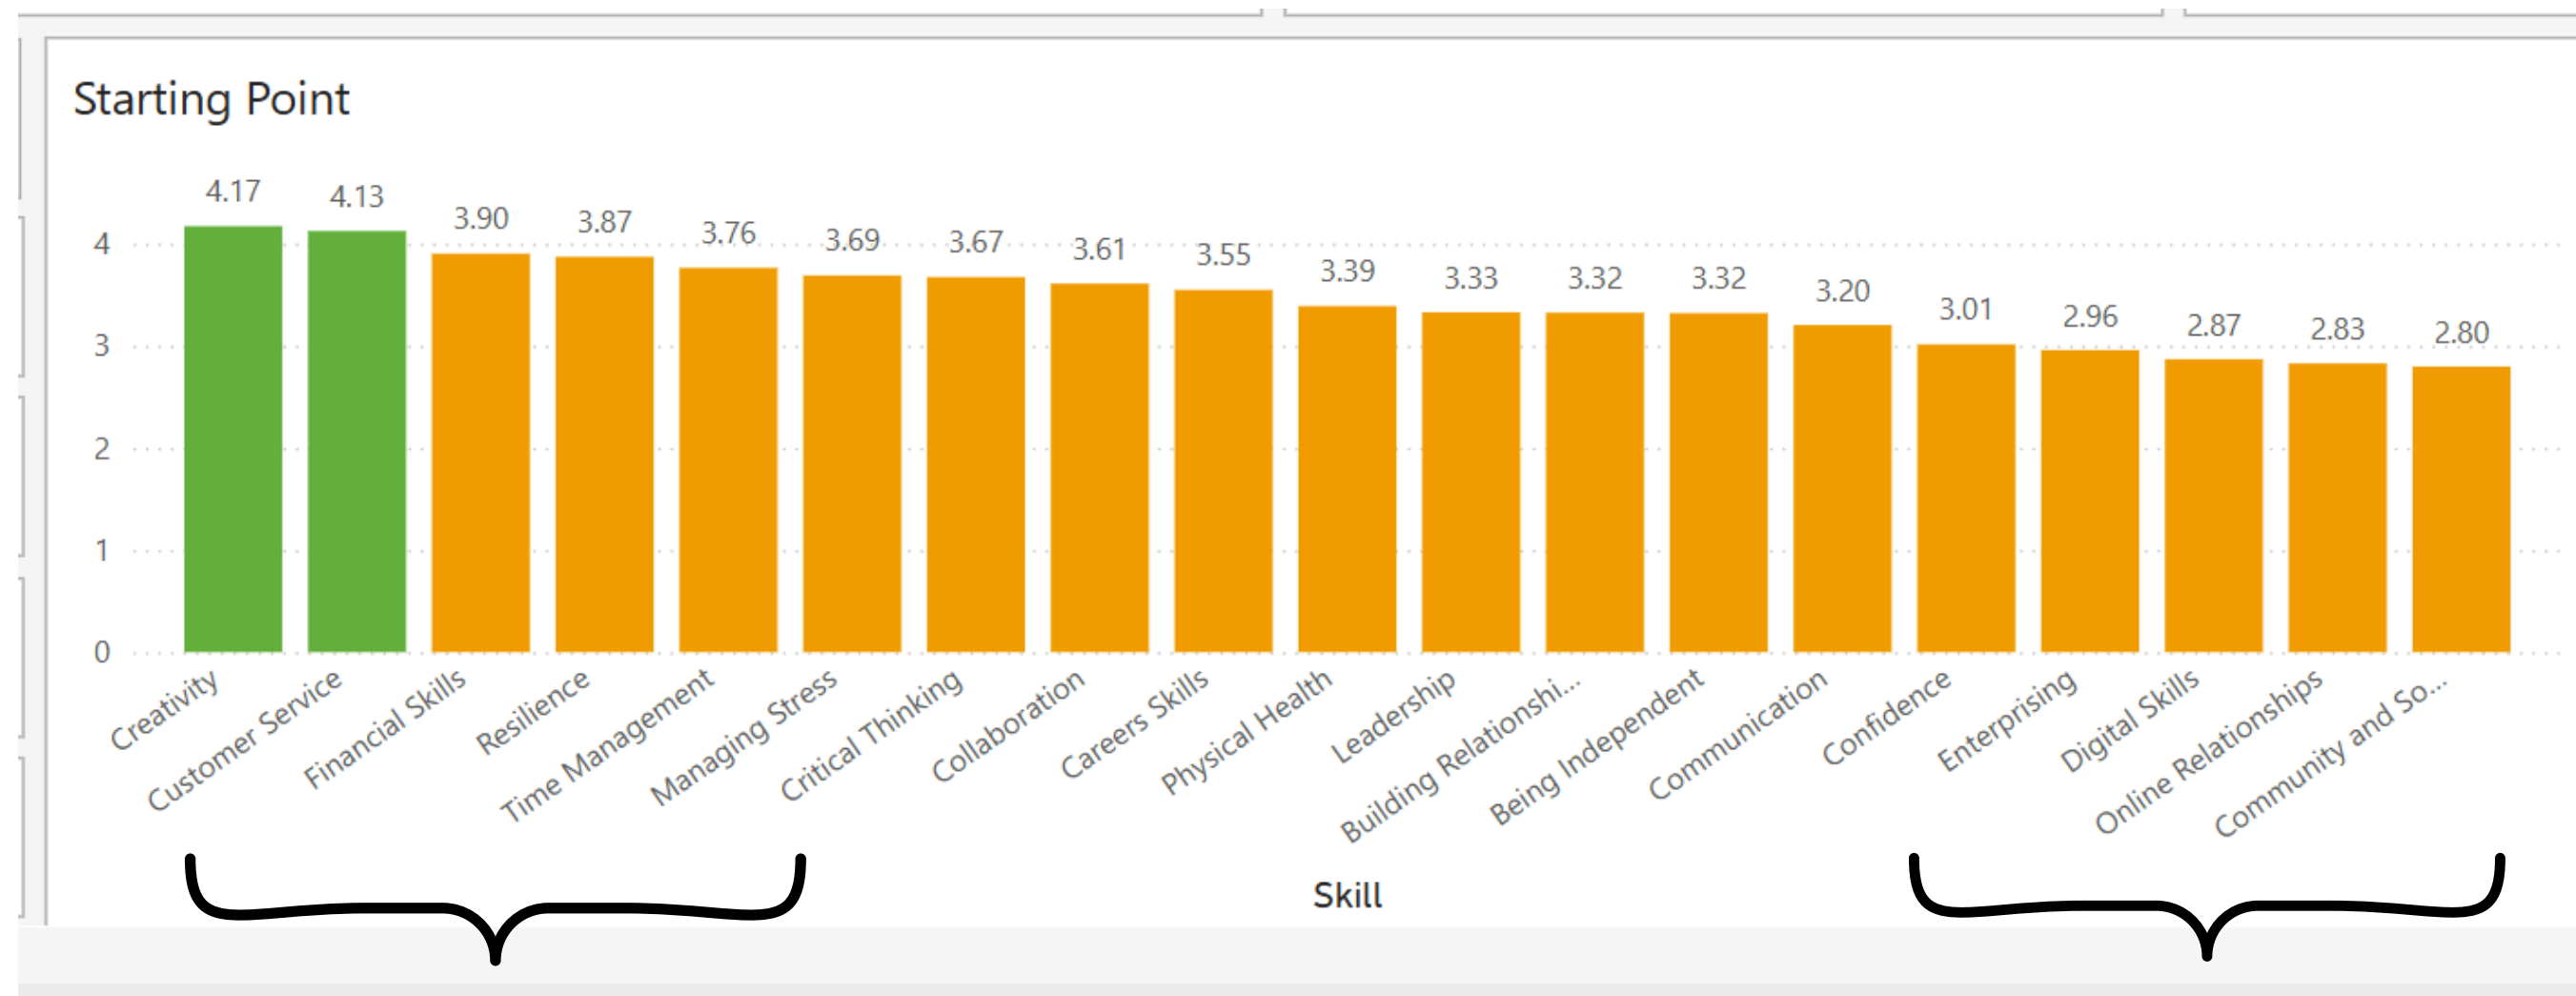

Starting Point

Use the filters to search for different cohorts or groups to see skills strengths and areas for improvement

Starting Point

Use the filters to search for different cohorts or groups to see skills strengths and areas for improvement

These skill strengths may indicate to me that this cohort are:

- Studying a creative subject
- Have part time work in a customer facing role
- Earn their own money and can manage it successfully
- Have built resilience from their part time work and are able to manage their time and stress from these roles.

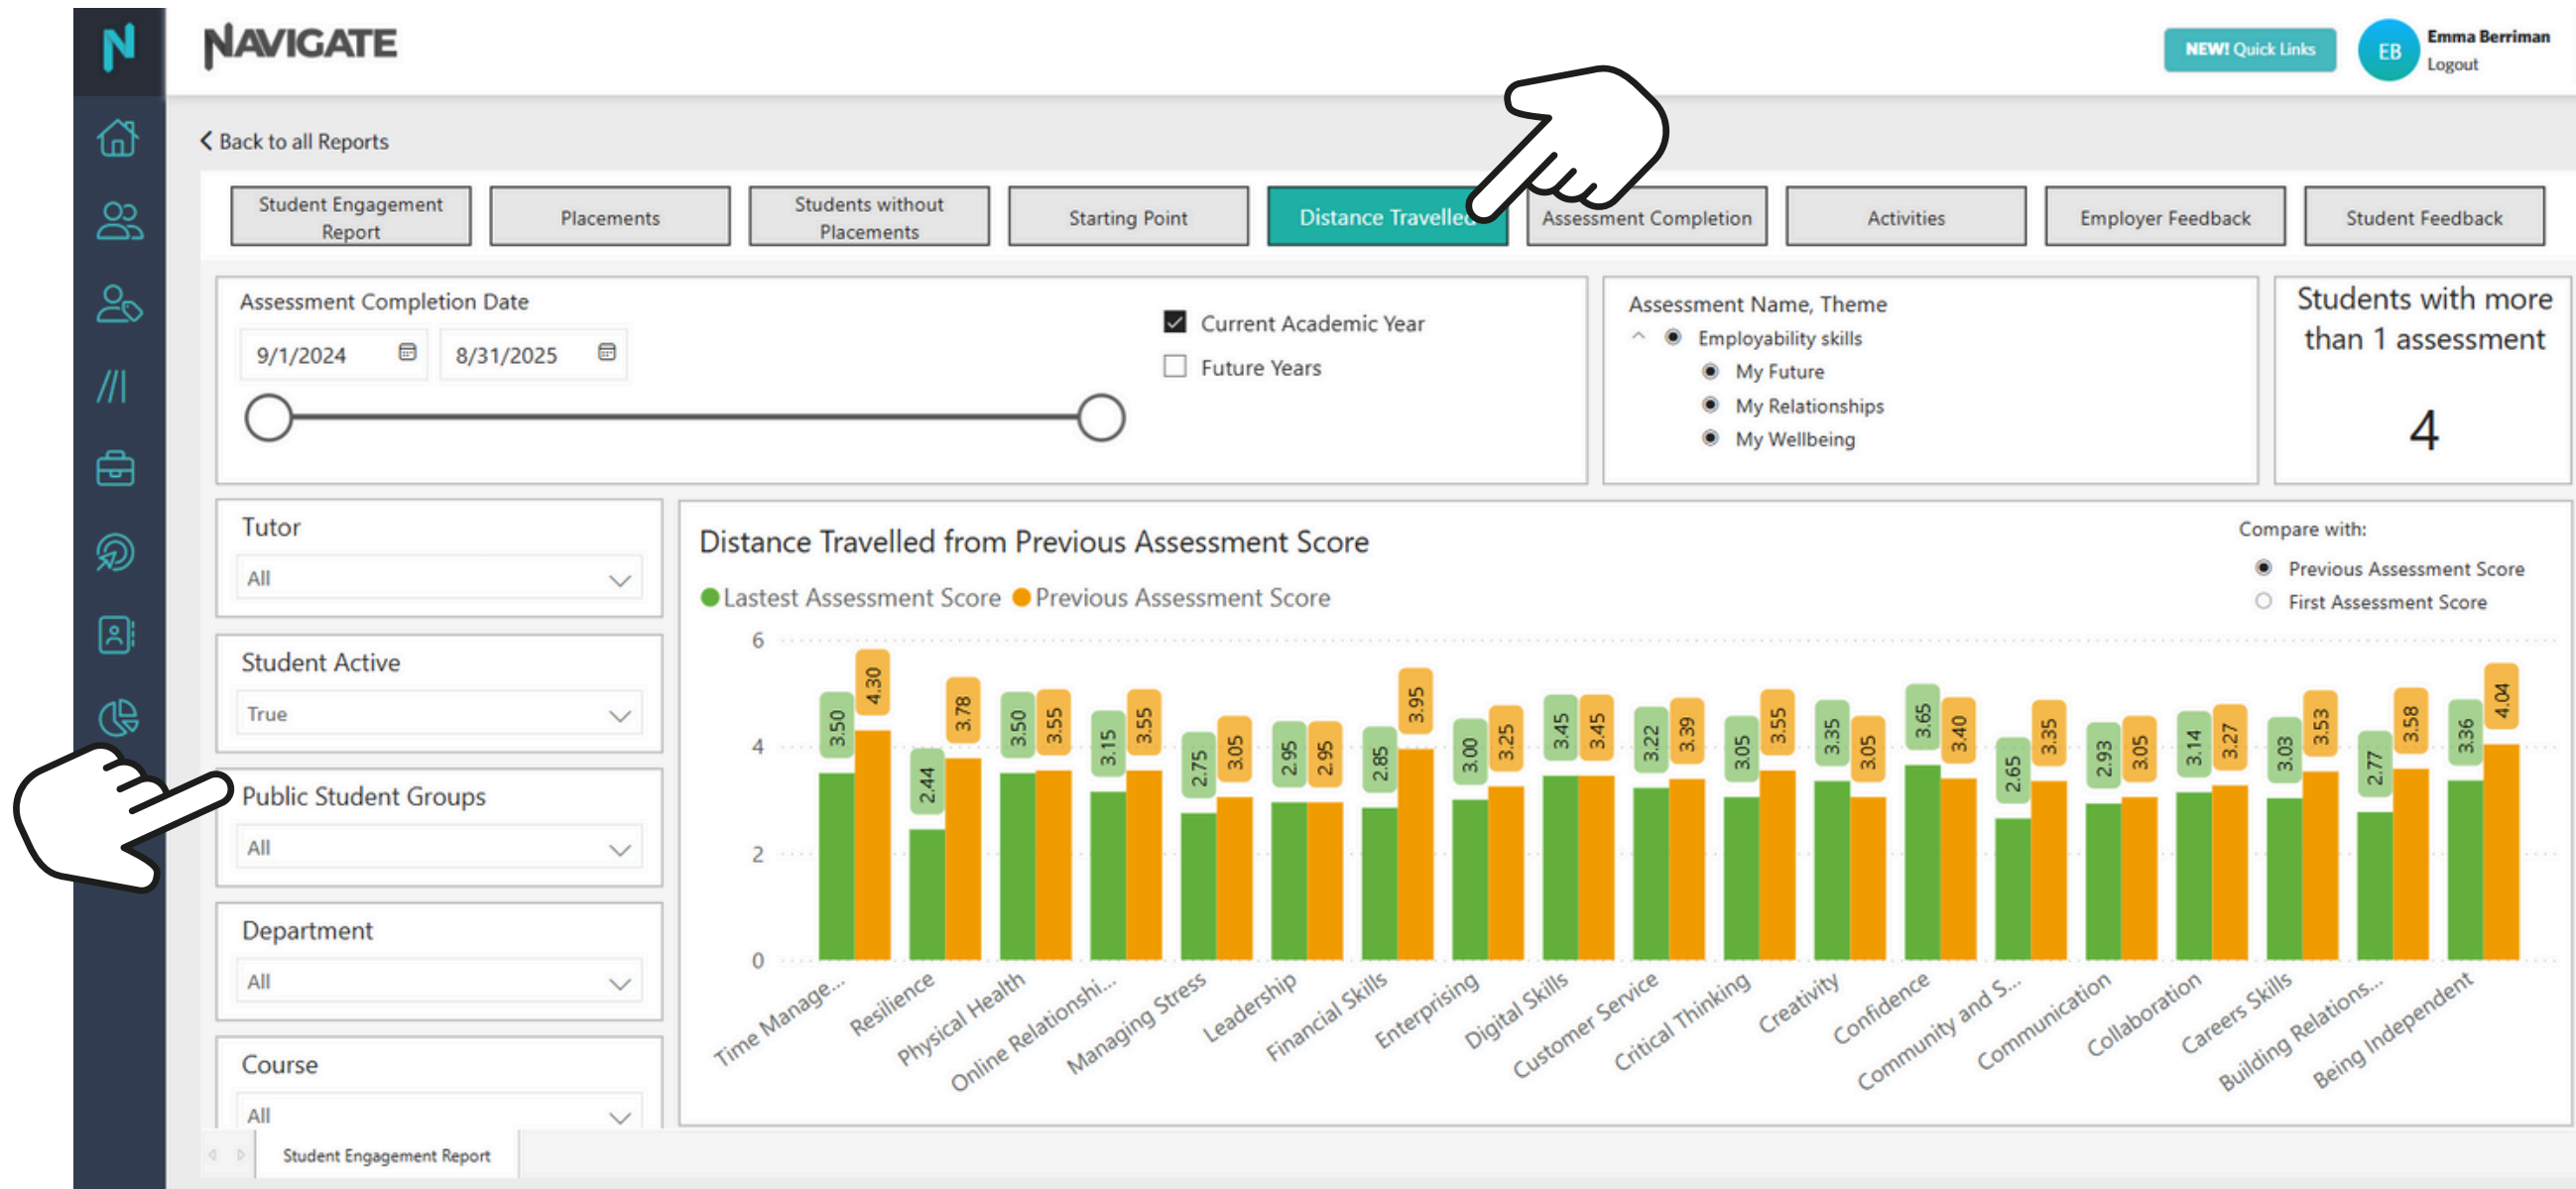

What I can do with these lower skills scores:

- Look at offering a short online basic digital skills courses to this cohort.
- Ensure there is an earlier focus in the tutorial scheme of work to ensure these students are offered guidance to manage online relationships safely
- Arrange some volunteering that relates to their course where they can actively use their strengths and knowledge for a community project

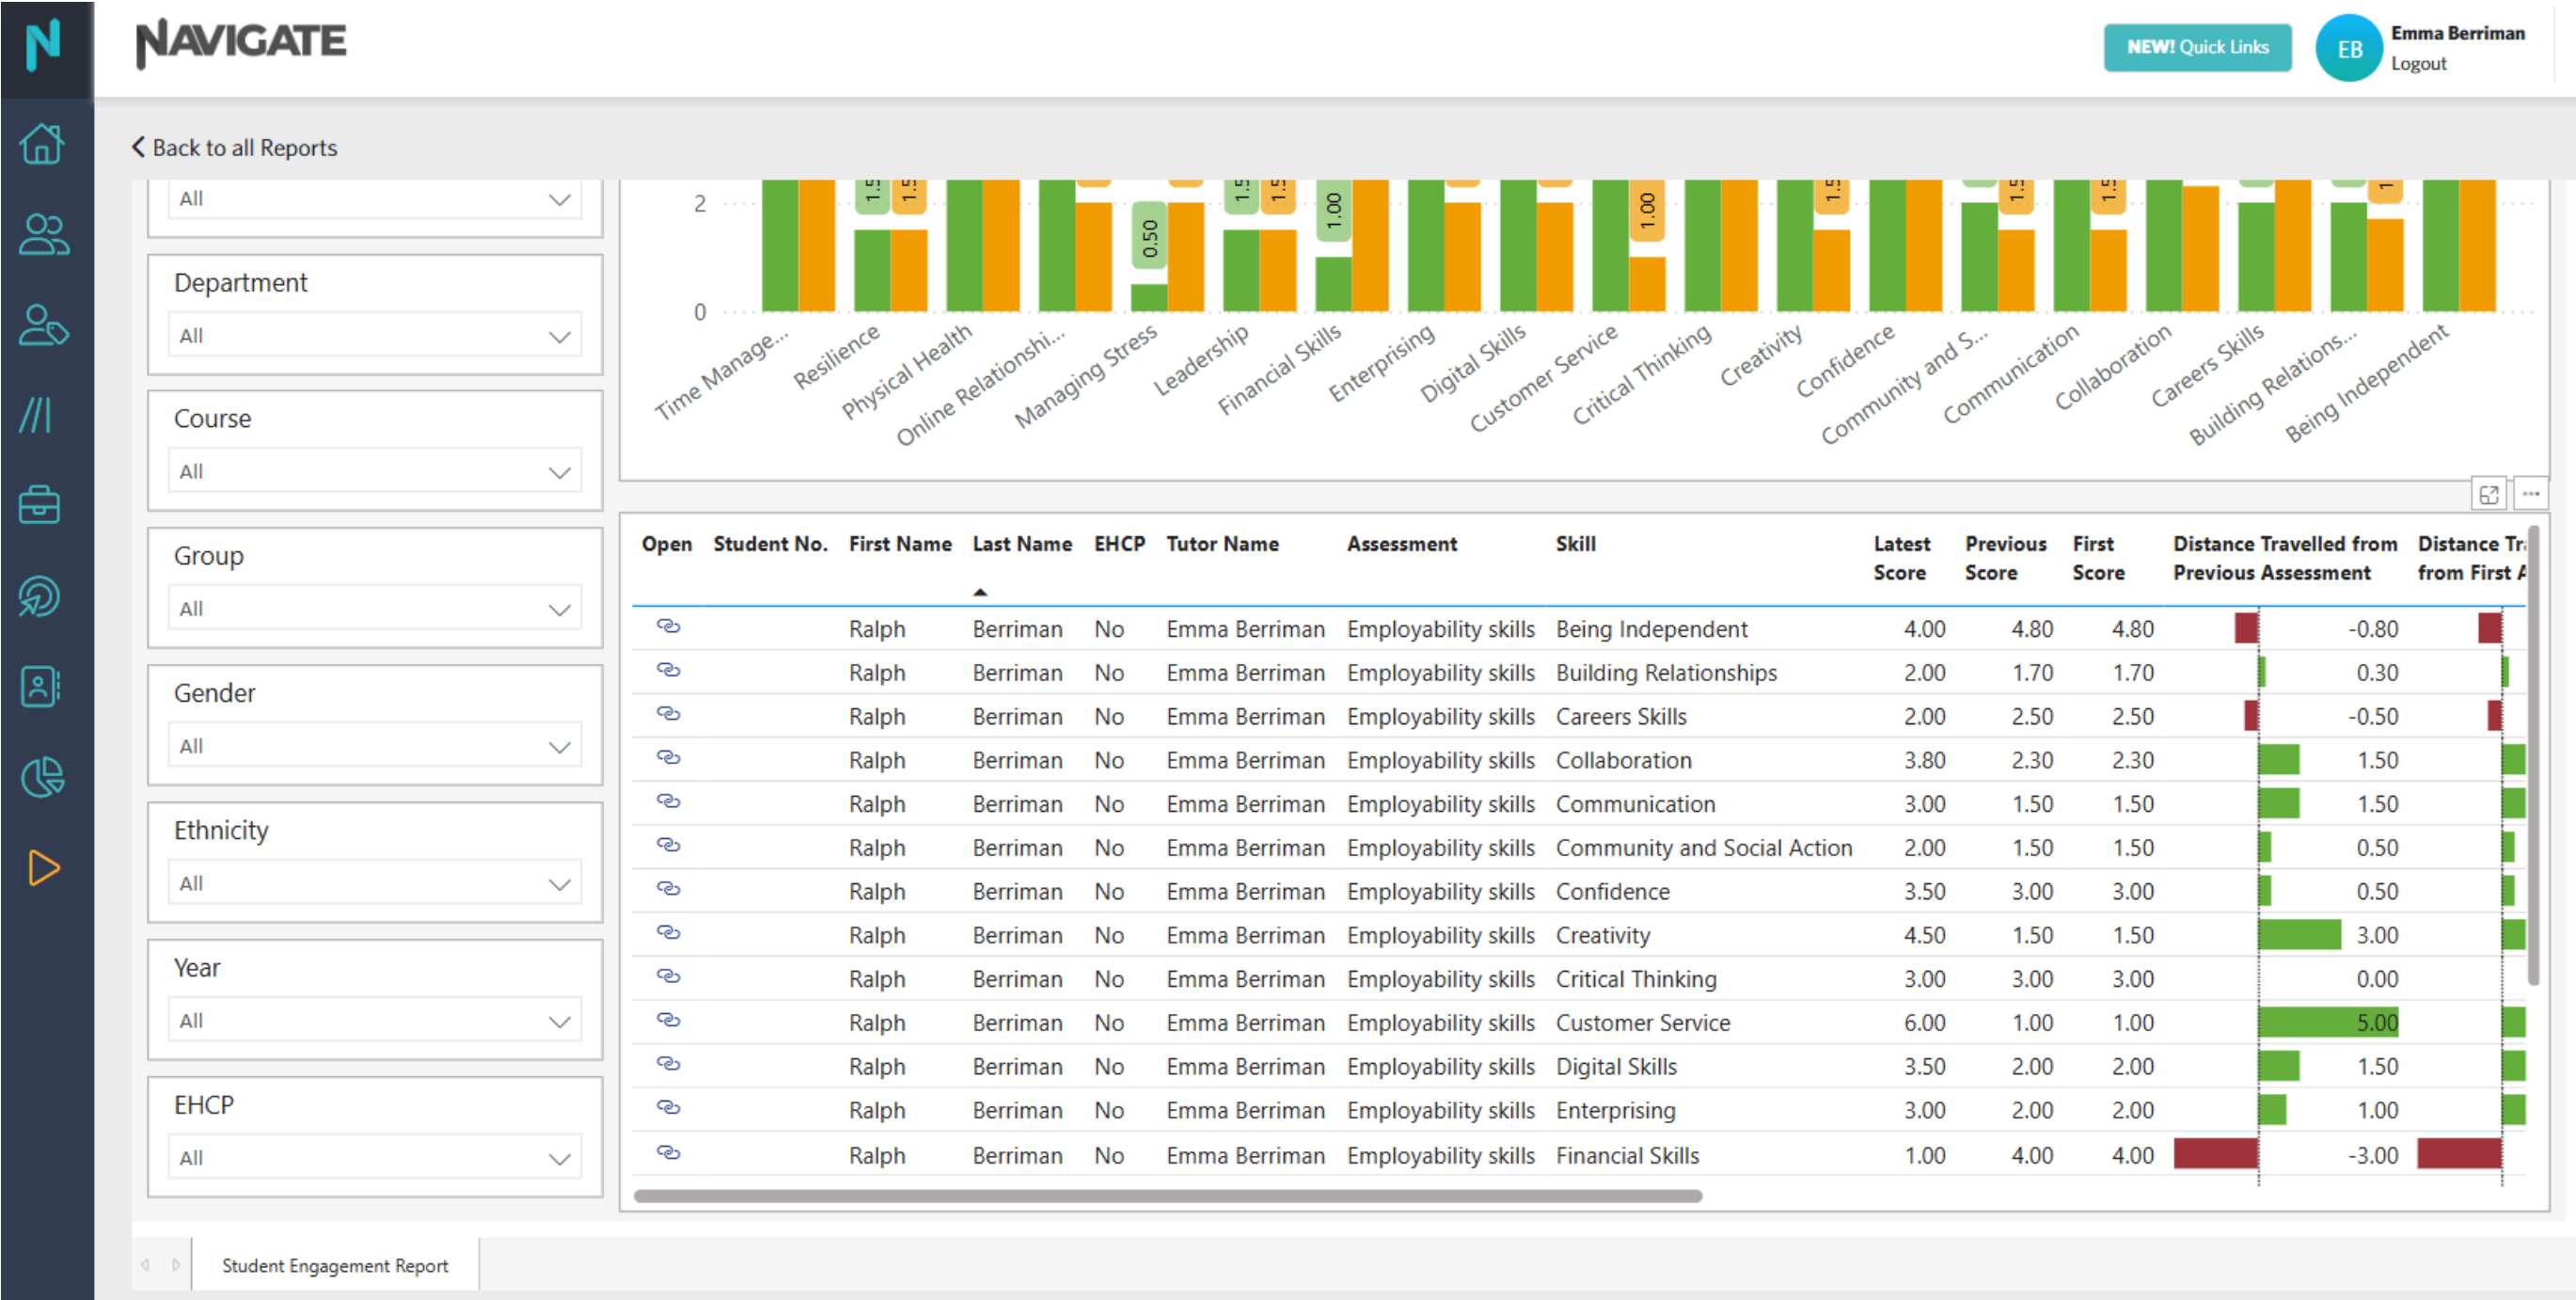

Distance travelled

When students complete the Skills assessment multiple times, you are able to view distance travelled for individuals or cohorts

Use the filters to define the cohort you wish to view.

Distance travelled

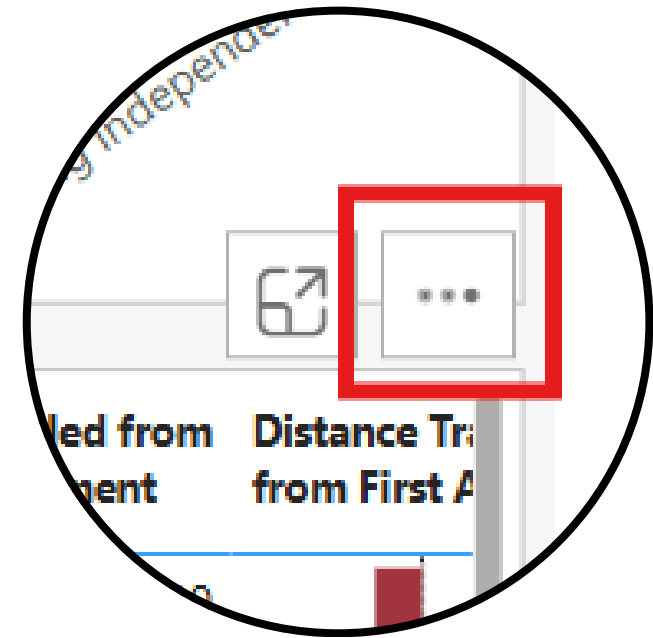

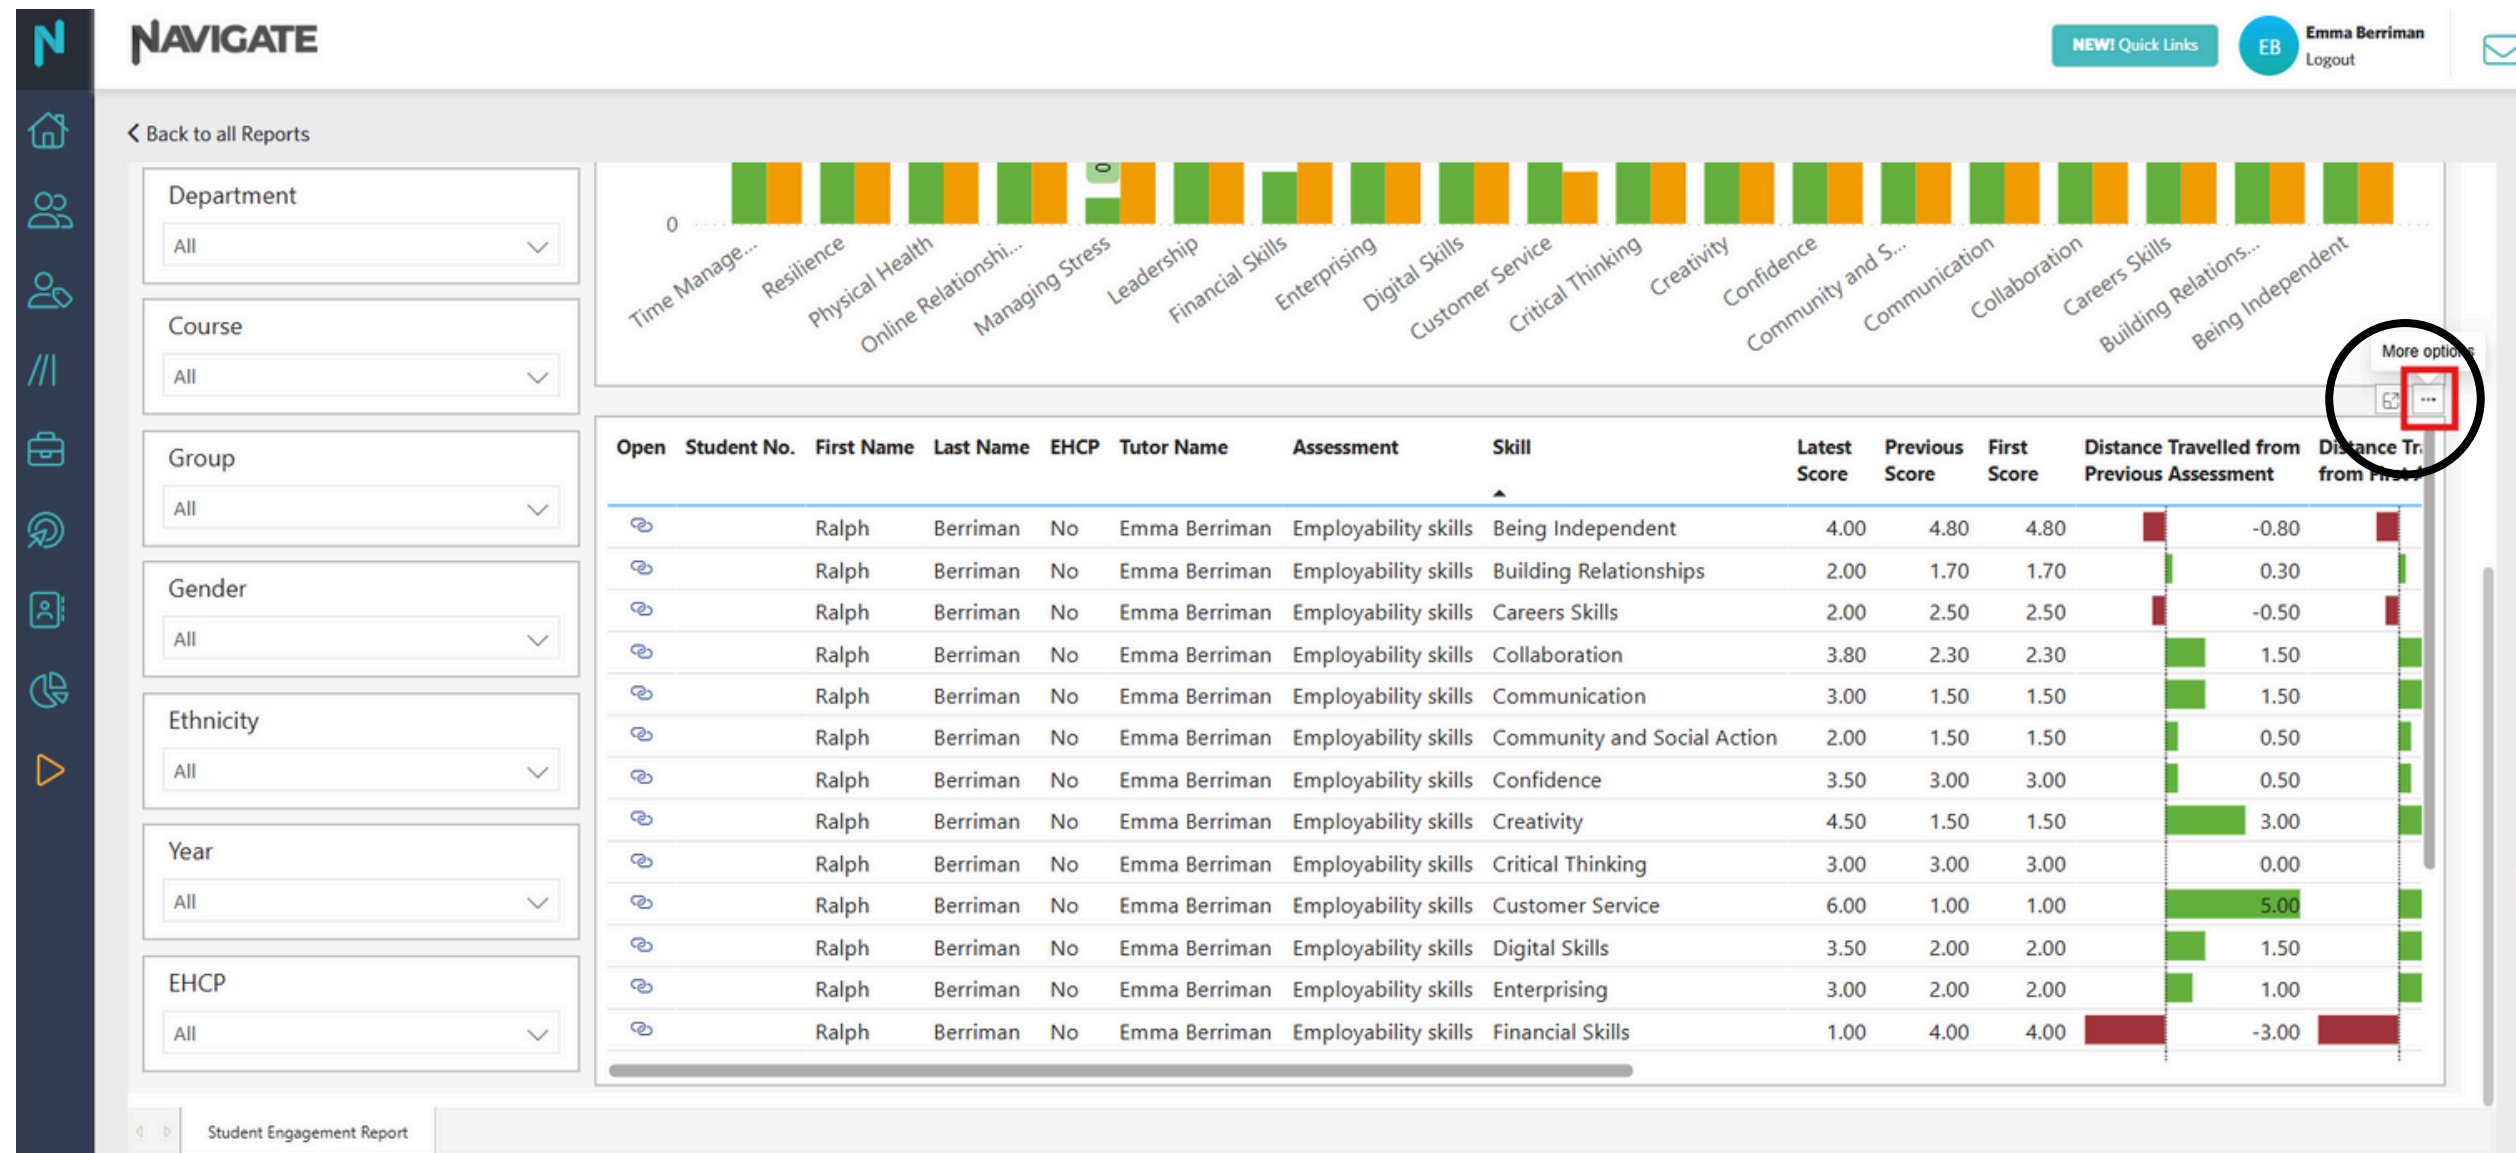

Scroll down for the grid view.

Here you can view the distance travelled for each individual student. You can see skill growth for many skills in green. You can also see skills which they have scored lower than in previous assessments.

Distance travelled - detailed

You can pull this data into a spreadsheet to use for 1:1's, reports, extra support & tutorial content.
